Pleasure Trip To LaConte Glacier

Early this morning K. J. Johansen took a party of townpeople to the LaConte Glacier for a days sightseeing.

The party consisted of Mr. and Mrs. Hofstad and daughter, Mr. and Mrs. Schott and daughter, Mrs. Willson, Miss Pick, Mr. Theo. J. Richardson and Mr. and Mrs. Bronson, daughters and guest, Miss Lielo Noyes.

Party Returns

Monday evening the pleasure party consisting of Mr. and Mrs. Samuel Cunningham, A. Sorset, Mrs. Peter Jensen, Mrs. H. Wallace and Miss Christina Lemieux, returned to Wrangell after an absence of about ten days at Bat's Harbor and Big Bay. The party report a pleasant outing among the hills and streams and return much refreshed by their pleasure trip.

If you want a crab, go to Denney's.

Spokane Raised

The Pacific Coast Steamship Company's excursion steamer Spokane, which struck a rock and was beached in Seymour Narrows on the 29th of June, has been successfully raised. The time for the raising was set at the 27th of July when the low tide would be the lowest and on that date the steamer was successfully raised and started for Seattle under her own steam.

The Spokane will resume her excursion trips after the present trip of the Queen, which is in Southeastern Alaska waters now.

U. S. Deputy Marshall

Wm. F. Schnable Recieves Appointment As Deputy Marshall At Wrangell

U. S. Marshall, Faulkner and Deputy Marshall, Wm. F. Schnable, came up on the Jefferson Sunday. Wm. F. Schnable has been officially appointed to fill the vacancy made by the resignation of J. F. Collins.

Mr. Schnable comes to Wrangell well recommended and with experience that will make him invaluable as an officer. He is a pioneer and the son of a pioneer. His early life was spent on the plains of Idaho in the different occupations of a cowman.

His varied experiences as an officer covers a period of about fifteen years. He has served as Deputy Sheriff and City Marshall in cow-towns. In following criminals escaped from the State Penitentiary the plainsmanship of his ranching days served him well.

Nor is he a tenderfoot in Alaska. In his fourteen years experience in Alaska and Yukon Territory he has all of the important trails and passes and has served as guard and deputy officer for five years.

Mr. Schnabel comes to Wrangell a stranger, well recommended, with no instructions excepting the law and with a firm determination to execute official duties promptly and impartially. For the furtherance of this end he wishes the co-operation of all law-abiding citizens of this precinct.

Haines Visited By Forest Fire

The town of Haines was visited on the 20th and 21st by a forest fire that threatened to eat up the town and the millions of feet of timber surrounding.

The entire garrison of Ft. William H. Seward and every citizen of the town turned out and succeeded in getting the flames under control before the town was damaged. About twenty acres of timber land and the plant and yards of the Adams sawmill was destroyed.

Is Your Bid In?

At six o'clock this evening the chance to put in a bid for the contract for extending the water system will be forever gone. Some enterprising Wrangell workman will have put in a bid that was low enough to secure the contract, yet make a fair profit for his time and energy.

The pipe, hydrants and couplings necessary for the work came upon the Humboldt Tuesday evening. Everything necessary for the work is here and it is hoped that the successful bidder will push the work to an early finish.

Family Outing

Two Wrangell families have gone out this week for an extended camping trip. On Sunday, Jack Mantel took Donald Sinclair, wife and children, to Anita Bay where they will spend two weeks. This has become a regular summer proceeding for the Sinclair family and they are certain to enjoy the outing.

On Wednesday morning Mr. and Mrs. T. J. Case and family left on a similar trip.

There is no more enjoyable pastime than camping out and no more enjoyable place to camp than among the mountains and trout streams of Alaska.

Catch Cohoes

The Standard, belonging to Lyons and Blackington, came to Wrangell Tuesday evening with about a thousand Coho salmon caught with troll lines off Baranoff Island, about 110 miles from here. C. M. Caulter came in on the Standard having bought the fish to ship fresh to Seattle.

Passengers on "Telegraph"

The following list of Passengers went up to Telegraph Creek on the Telegraph last Thursday: Wm. Foster, J. F. Callbreath, A. E. Belfry, A. V. Johnstone, Rodney McKay, Mrs. Wm. Neill and the Misses Hendrickson.

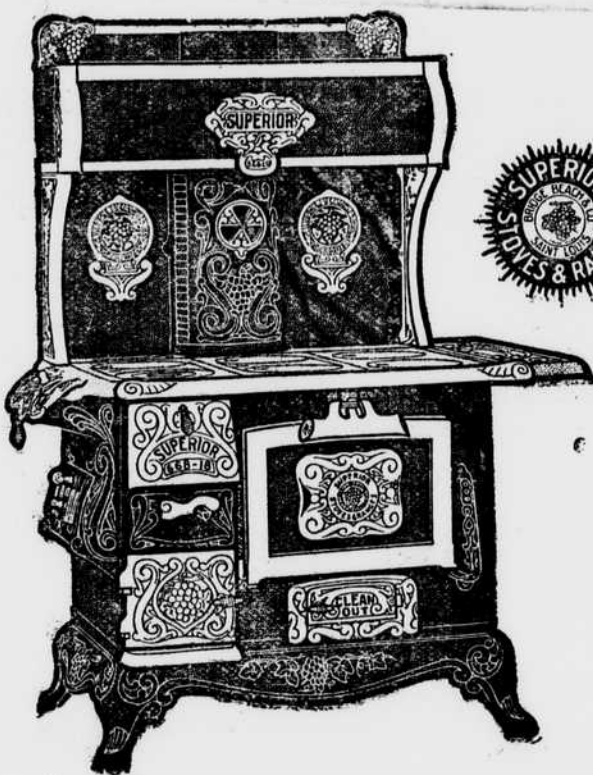

News was recieved Monday that the boat had reached Telegraph Creek after a successful trip.

The gas screw, "J. G. Osborne" is ready for charter by the job, day or hour at reasonable rates.

For further information, inquire of Al Osborne, owner, or W. E. Parrott, Master.

Found:—A pair of gold rimmed nose glasses in a boat by the float. Owner please call at Sentinel office or same.

THE WRANGELL SENTINEL

HAROLD F. DAWES, Editor and Proprietor.

The Seattle Post-Intelligencer of July 22 has an editorial on Alaskan conditions which is very interesting. It states, and the article bears out the statement, that, "Ignorance of Alaska is one of the most impressive facts in the history of the day."

It states that when Secretary of the Interior, Fischer, visits Alaska this season, he will not find the conditions as they have been painted by the muckrakers. That all of Alaska coal is not included in the Cunningham claims. We are aware of the fact that there is more coal and we are also aware that it is locked up as tightly as the Cunningham finds.

It says that "Men from the East will visit Nome or Valdez or rush up through the Inside Passage and back again and then write marvelous tales of the great country they have seen; and in lurid lines tell how Alaska is being plundered by corporations and otherwise outraged". It looks as though the writer had been up the coast, saw the conditions, and then after distorting and extending them, denied them for some purpose.

A World Wide

Steel Trust

We have our American Steel Trust. That has been bad enough, but it is now looking worse. All the great steel manufacturers of the world are planning to combine. It is evident that a Free Trade or Protective Tariff will have nothing to do with such an organization. What shall be done? The only

thing is government control. Just as railroad rates are regulated, let the out-put of all large manufacturing combinations be regulated, both as to the prices and wages paid.

Whenever manufacturing concerns wish to combine, let Uncle Sam say, "Gentlemen you have my permission, but you must, if you combine, let me say what prices shall be paid for the things that you sell, and also what wages you shall pay."

Unequal Rates

Saving of \$9,000,000, is Expected When Railroad Rates Are Adjusted

Postmaster General Hitchcock, has announced that a saving of nine millions of dollars can be saved by adjustment postal carrying rates without doing any injustice to the railroads. The recent investigations show that out of 394 companies reported 278 are making profits while 116 are carrying mails at a loss. The large Trunk Lines are receiving the profitable contracts.

When the government is able to save nine million a year from railroad mail contracts, and has already instituted reforms that have changed a usual deficit to a surplus. It is no idle fancy to see penny postage established soon.

A GRANITE BOMB.

Jack Frost Hurlled It Down Into the Yosemite Valley.

Delicate frost tracings on the window panes seem to be the work of fanciful and harmless sportiveness, but the hand that forms them is capable of greater deeds and of other kinds. Mr. J. Smeaton Chase, in "Yosemite Trails," describes an experience that must have been wonderfully impressive to the spectator. He had been spending some weeks in exploring the Yosemite valley and the "great rocks," like El Capitan, that wall it in.

Standing one day of late autumn about the middle of the valley, I was startled by a report like a cannon shot, which filled the whole valley with echoes that roared and boomed, repeated and multiplied, in a long continued, glorious tumult.

As the deafening sound died away in sullen mutterings under the vizor of El Capitan I was able to distinguish the point of attack by the long, clattering descent of a vast quantity of rock.

The night had been a cold one in the valley, and on the seven to eight thousand foot levels of the upper rim the temperature must have dropped almost to zero.

Frost, working quietly with his Archimedean lever, had just succeeded in shifting from the shoulder of the sentinel a trifle of fifty tons or so of granite. For near a thousand feet the boulder fell sheer, swift and silent; then, striking the cliff, it burst like a bomb, shattered into a myriad flying shards and splinters and dislodged a smother of fragments that trickled down to the valley in a stream that lasted for minutes.

Then from the spot where the boulder had struck dust began to rise into the sunny air, slowly building up and burgeoning like a summer cloud and every whit as snowy. It was the flou of granite, powdered instantaneously by the terrific shock.

GOWNS AND OMENS.

Odd Superstitions That Darken the Dressmaker's Shop.

"Women who wear fine dresses are as superstitious as the girls who make them," said a dressmaker. "If the little accidents that happen in the workroom were not mercifully concealed from the owners of rich gowns they would be sick with apprehension half the time. I had one customer who refused to accept a very expensive dress because a girl who assisted with the fitting dropped a pair of scissors, which fell point down and stuck in the floor. That meant an order for mourning within six months. The customer hoped that by refusing the hoodoo dress she could avert the calamity, but the precaution was useless. In less than three months her father was dead.

"Girls are especially particular in their work on wedding dresses, for if a tiny drop of blood from a pricked finger should fall on the gown the bride would surely die before the end of the year. Then there is green thread. Whether the customer is there to see it or not, no dressmaker will keep green thread near spools of any other color. Green thread used for basting means the return of a dress for alterations, and there is enough trouble of that kind in a dressmaking establishment without deliberately bidding for it.

"Women who are themselves superstitious are never surprised or offended at a sewing girl's untidy coiffure. The girls tumble their hair about on purpose when working on a large order, for it is a sacred belief among dressmakers that a hair inadvertently worked into the garment shows that more work is coming soon from the same customer."—New York Sun.

A Hospital Nurse's Hands.

As an example of trademarks have you ever noticed the hands of the hospital nurse? The soft white hand which in fiction is occupied in cooling fevered brows does not exist and could not. It is a skilled hand, but its work makes it rough and chapped. Try bathing your hands in disinfectants twenty times a day and you will find that, look after them as you may, they will soon be seamed with cracks, which an east wind often turns to bleeding cuts. And as they are worked hard for some twelve or thirteen hours a day the nurse takes a somewhat larger size in gloves than most women. If you ever see the photograph of a hospital nurse you may observe that she prefers to keep those hands behind her back.—London Chronicle.

Longest Family Tree.

The biggest family tree in the world is believed to be the one which traces the genealogy of Queen Elizabeth back to King David and thence to Adam, or at least as near to Adam as one could get. The coat of arms is given in almost every case, with full particulars of the dates of births and deaths. The labor of providing coats of arms is abandoned before Methuselah's time, but the chart measures forty-five feet and certainly does take one through a maze of nobility.

Geo Klauitz is building a 32 foot scow, 9 ft. beam, for the river boat, Telegraph, to push freight up the river on. The Telegraph has recently doubled her motive power but the lack of space for hauling freight hampered the business getting ability of the lively little twin-screw boat. However with a 32 foot scow to load freight on the work of the boat will be more than double.
